

## Underriner Homework #1

Underriner\_writeup: Jupyter notebook with answers to homework questions and related graphs and tables.

Underriner HW\_1 - This file loads and cleans the data. If you import all the functions (and hardcoded URLs in the file) all you need to run to load and clean the data for use in the analysis Jupyter notebook is:

```
crimes = run_me(url_2017, url_2018, census_data, community_data)
```

chicago-community-areas.csv - A dataset of mapping neighborhood names to community numbers, loaded from Underriner HW\_1
